

Basic Transactions of WorldTracer: An Explanatory Guide

WorldTracer is a global baggage tracing system used by airlines and airports worldwide to reunite lost and mishandled luggage with their rightful owners. It's a secure and automated platform that allows airlines to track and manage baggage throughout its journey and communicate with passengers regarding its whereabouts. In this article, we'll explore the basic transactions of WorldTracer and how they help facilitate the smooth and efficient handling of lost luggage.

Creating a Baggage Report (BR)

The first step in the WorldTracer process is for the passenger to file a Baggage Report (BR) with the airline. This report contains essential information about the lost baggage, including its description, contents, and the passenger's contact details. The airline staff will then create a WorldTracer record and assign it a unique ID.

Searching for the Baggage

Once the BR is created, the airline will initiate a search for the baggage within its own system. If the baggage is not located within a specific timeframe, the airline will expand the search to other airlines and airports participating in WorldTracer. The system allows airlines to search for lost luggage based on various criteria, such as the baggage tag number, description, or destination.

Updating the Baggage Status

As the search progresses, the airline will update the WorldTracer record with the latest information about the baggage's status. This may include updates on its location, any delays, or any changes to the delivery arrangements. The passenger can access the WorldTracer record using the unique ID provided by the airline to view the latest status of their baggage.

Communication with the Passenger

Throughout the tracing process, the airline will communicate with the passenger to provide updates on the baggage's status. This communication can be made via email, phone, or SMS, depending on the passenger's preference. The airline will also inform the passenger of any necessary actions to facilitate the delivery of their baggage.

Closing the Baggage Report

When the baggage is located and delivered to the passenger, the WorldTracer record will be closed. The airline will record the outcome of the tracing process, including the date and time the baggage was delivered.

The passenger will also be provided with a copy of the closed BR for their records.

Other WorldTracer Transactions

In addition to the basic transactions described above, WorldTracer offers various other functionalities to support the efficient handling of lost luggage:

- **Passenger Self-Service:** Passengers can create and track BRs online or through the WorldTracer mobile app, allowing them to stay updated on the status of their baggage.
- **Resolution Management:** Airlines can collaborate with each other through WorldTracer to facilitate the resolution of complex baggage handling issues and ensure timely delivery to passengers.
- **Data Analysis and Reporting:** WorldTracer provides comprehensive data analysis and reporting capabilities that help airlines track and monitor their baggage handling performance and identify areas for improvement.

Benefits of WorldTracer

WorldTracer has revolutionized the handling of lost luggage by providing numerous benefits to both airlines and passengers:

- **Improved Accuracy and Efficiency:** The automated and centralized system ensures faster and more accurate tracking of lost luggage, reducing the time and effort required to locate and deliver it.
- **Enhanced Passenger Communication:** Real-time updates and direct communication with passengers keep them informed about the progress of their baggage tracing and provide peace of mind.

- **Reduced Costs:** By automating the baggage tracing process, airlines can reduce operational costs and improve their overall efficiency.
- **Improved Customer Satisfaction:** Timely and effective baggage handling enhances passenger satisfaction and builds brand loyalty.

WorldTracer is an essential tool for airlines and airports to manage lost and mishandled luggage effectively. Its seamless transactions facilitate the tracking, searching, and delivery of baggage worldwide, providing peace of mind to passengers and improving the overall baggage handling experience. With its advanced technology and commitment to passenger satisfaction, WorldTracer continues to revolutionize the industry and play a vital role in the safe and timely delivery of luggage.
